DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03 November 2005 has been entered.

Response to Arguments

2. Applicant's arguments in view of the amendment filed 03 November 2005, with respect to the rejection(s) of claim(s) 17-20, 23, 26-27, 30 & 33 under 35 USC §102(b) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of U.S. Patent No. 5,545,259 to SUZUKI *et al.*

Claim Objections

3. Applicant is advised that should claims 19-20 be found allowable, claims 26-27 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing

one claim to object to the other as being a substantial duplicate of the allowed claim.

See MPEP § 706.03(k).

Claim Rejections - 35 USC § 102

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claims 17-18, 23, 30 & 33 rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,545,259 to SUZUKI *et al.* (hereinafter "SUZUKI"). SUZUKI discloses the operation of a drain pump in a washing machine driven by an AC induction motor, the operating steps including starting the drain pump and running it for a first period of time (see "DRAINAGE" and/or "WATER SUPPLY AND DRAINAGE" times ranging from 10-60 SECONDS), stopping the pump for a second time period between 10% and 1% of the first time period (see "STOP" times ranging from 2-3 SECONDS which inherently must be "braked" to stop otherwise the rapid start/stop times would not occur), and repeating the steps (see entire document of SUZUKI, especially Figure 5 and relative associated text). Recitation of SUZUKI reads on applicant's claimed invention.

Claim Rejections - 35 USC § 103

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

7. Claims 19-20 & 26-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over SUZUKI. Recitation of SUZUKI is repeated here from above. While SUZUKI does disclose running the drain pump for a period of 10 seconds, SUZUKI does not expressly disclose stopping the drain pump for approximately 200 milliseconds.

Further, it is to be expected that a variance in range would be an unpatentable modification. Under some circumstances, however, changes such as these may impart patentability to a process if the particular ranges claimed produce a new and unexpected result which is different in kind and not merely degree from the results of the prior art, such ranges are termed critical ranges and the applicant has the burden of proving such criticality. It has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233, 255 (CCPA 1955). See also *In re Waite*, 77 USPQ 586 (CCPA 1948); *In re Scherl*, 70 USPQ 204 (CCPA 1946); *In re Irmischer*, 66 USPQ 314 (CCPA 1945); *In re Norman*, 66 USPQ 308 (CCPA 1945); *In re Swenson*, 56 USPQ 372 (CCPA 1942); *In re Sola*, 25 USPQ 433 (CCPA 1935); *In re Dreyfus*, 24 USPQ 52 (CCPA 1934).

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: U.S. Patent No. 5,762,080 to EDWARDS *et al.*, which discloses a method of operating a washing machine drain pump by repeatedly starting and stopping the drain pump.
